About

Dedicated web developer with experience in **Fullstack** development using **Typescript** specializing in **React** and **Node.js**

Experience

PatchVid - Side Project - patchvid.vercel.app   September 2024

Developed a tool for creating customizable videos to showcase service updates, available via web and Discord platforms. Built a monorepo using **Turborepo** with **Next.js** for the web app, **Express** for video rendering, and **Discord.js** for the bot. Integrated **RabbitMQ**, **Redis**, **Mongoose**, and MongoDB to manage a queue system and store user data efficiently. Utilized **Remotion** for video generation, with RabbitMQ handling messaging between services and Redis tracking user positions. **Dockerized** deployment for the Discord bot and rendering service.

NeedForscript - Freelance   June 2024 - September 2024

Served as Frontend Developer for a suite of scripts enhancing the FiveM roleplay experience. Developed intuitive, responsive user interfaces using **React** and **shadcn/ui**, and data fetching with **React Query**. Integrated API communication between client-side features and backend systems, optimizing performance for smooth gameplay. **Collaborated** closely with the backend team, focusing on a cohesive user experience across various gameplay elements.

YeaHire - yeahire.com   Mars 2024

Collaborated as Frontend Developer for a job aggregation platform pulling listings from multiple sources. Developed the user interface based on **Figma** designs using **React** and **shadcn/ui**. Implemented job search functionality with filtering, integrated **Supabase** as the database, and ensured responsive design for an optimal user experience across devices. Added the option for users to export job listings as CSV files.

Skills

Frontend development: HTML, CSS, JavaScript, TypeScript, React, Next.js, shadcn-ui, Tailwind css, Apollo client, Remotion, react-query, Vite, Webpack

Backend development: Node.js, Express, Nest ,Next.js, Graphql, Mongodb, Postgres, Serverless, Redis, TypeORM, Mongoose, Prisma, Apollo server

Version control: Git
